

Field survey of major infectious and reproductive diseases responsible for mortality and productivity losses of ruminants amongst Nigerian Fulani pastoralists. Bolajoko *et al*

QUALITATIVE DATA

The following qualitative data (annonymized) was collected from field survey discussions and contributions from key informants.

National Veterinary Research Institute, Vom, Nigeria

Report on major infectious and reproductive diseases in cattle, sheep and goats in Nigeria

1. MAJOR INFECTIOUS DISEASES OF CATTLE, SHEEP AND GOAT

Species	Major infectious diseases (of economic importance)	Mortality rates of each disease given (%)	Prevalence rates of each disease given (%)	Population at risk (proportion/%)	Economic loss due to each disease given at herd level (%)	Economic loss due each disease given at farmers level (%)	General remarks & sources of information given.
Cattle	<u>Dairy cattle</u>						
	Viral:LSD;FMD	LSD-20%; FMD-40%	60%; 80%	100%	<u>50%</u>	<u>50%</u>	FIELD LARGE ANIMAL CLINICIANS IN OYO STATE
Bacterial:CBPP;HS;BQ	CBPP-40% 'HS-40%, BQ-30%	90%	100%	<u>70%</u>	<u>70%</u>		
Parasites: TRYPANOSOMOSIS (TRYPS); FASCIOLOSIS	TRYPS-30%; FASCIOLOSIS - 10%	70%	100%	<u>60%</u>	<u>60%</u>		
		100% (seasonal)	100%	<u>40%</u>	<u>40%</u>

3.1 OTHER GENERAL INFORMATION

Instructions: (1) TYPE YES OR NO AS APPLICABLE. (2) LIST OR TYPE THE RESPONSE WHERE APPLICABLE.

- 1 Do Government (or other organizations) programs exist to control major cattle, sheep and goat diseases? No
- 2 If so which ones? Nil
- 3 For which diseases? Occasionally, CBPP vaccination campaign is organized in haphazard pattern in a few Local Government Areas
- 4 Annual, bi-annual, other? Not periodical. Once in a long unpredictable while.
- 5 Consist of: vaccination? Treatment? Other (like hygienic measures, culling, stamping out?)
- 6 If vaccination: which vaccines? Produced within Nigeria? Imported vaccines?(from which companies?) CBPP vaccines from NVRI, Vom.

- 7 Is (are) program(s) covering the whole country, or only regions or areas? (Which region(s), which area(s)) No . a few Local Government Areas
- 8 Which ones of these diseases can be controlled directly by animal owners, i.e. by procuring directly the vaccine and using it without need to wait for official vaccination programs? CBPP could be administered but Not without veterinary supervision

3.1 OTHER GENERAL INFORMATION

Instructions: (1) TYPE YES OR NO AS APPLICABLE. (2) LIST OR TYPE THE RESPONSE WHERE APPLICABLE.

- 1** Do Government (or other organizations) programs exist to control major cattle, sheep and goat diseases? **Yes**
- 2** If so which ones? **Annual Vaccination campaigns**
- 3** For which diseases? **CBPP, PPR**
- 4** Annual, bi-annual, other? **Annually**
- 5** Consist of: vaccination? **Yes** Treatment? **Yes but most farmers do it on their own.** Other (like hygienic measures, culling, stamping out?) **Stamping out especially when some highly infectious and contagious diseases especially Tuberculosis are diagnosed.**

- 6 If vaccination: which vaccines? **CBPP, PPR** Produced within Nigeria? **Yes, NVRI, Vom vaccines** Imported vaccines? (from which companies?)
- 7 Is (are) program(s) covering the whole country, or only regions or areas? (Which region(s), which area(s)) **In most cases States and Local Government Areas organize it for farmers under their jurisdiction**
- 8 Which ones of these diseases can be controlled directly by animal owners, i.e. by procuring directly the vaccine and using it without need to wait for official vaccination programs? **All diseases especially when outbreaks occur. This should be under the supervision of a Veterinarian or Local Government Animal Health Personnel.**
